Re: People v. Film Recovery Inc.

Dear Bob:

As you probably know, this company is responsible for the existance of certain plastic chips contaminated with cyanide and silver which are located in various semi-trailers located throughout the Chicagc area and also in a warehouse near Dixon in Lee County, Illinois.

Lee County is one of the counties which I represent and we are concerned as to the plans of the USEPA to clean up this hazard. I would appreciate your advising me as to the plans of the USEPA in this regard or your suggestions as to who I can contact to obtain this information.

Yours very truly,

Louis J. Perona *jl*
